

COST-EFFECTIVENESS WORKING GROUP MEETING 2/28/22

Agenda

1. Update from members on CE developments

Meeting Notes

Due to a lack of CE activity in California over the past month, there was little to talk about during the meeting.

Greg and Terry Fry had an engaging discussion about some of the key issues on the horizon with regard to valuation of avoided resources and the likelihood of some major issues arising in the future about how to properly value avoided carbon.

Greg noted that until such time as a proceeding is open, there isn't likely to be much to discuss for this Member Working Group.

Next Meeting

Our next Working Group meeting will be on March 21, 2022. However, if there aren't any new CE developments, we will cancel the meeting a few hours before the meeting.

Meeting coordinates are as follows:
