Sacramento, CA 95814

Re-confirmation of Angelina Galiteva to the California Independent System Operator (ISO) Board of Governors – Support

Dear President Pro Tempore Atkins,

On behalf of the California Efficiency + Demand Management Council (Council), I enthusiastically support Angelina Galiteva's re-confirmation to the California Independent System Operator (ISO) Board of Governors.

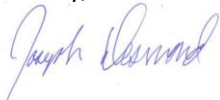

The Council is a trade association representing a wide range of companies that provide energy efficiency and demand management services and products in California, although our organization does not include utilities. We represent companies that design, implement, maintain, and evaluate energy efficiency and demand management solutions and employ thousands of people who play an important role in California's economy.

Ms. Galiteva has served on the Board of Governors since 2011 and is currently in her third term. She is also President of NEOptions, Inc., a renewable energy and new technology product design and project development firm. Her industry experience includes serving as Executive Director of the Los Angeles Department of Water and Power and head of its Green LA, Environmental Affairs, and New Product Development Organization. Her career includes working with the California ISO and Power Exchange on their initial launches and as a power analyst for the New York Power Authority.

Ms. Galiteva works to advance the deployment of renewable energy and distributed energy technologies (DERs) worldwide, initiatives that align with the mission of the Council. In her Board capacity, she understands the requirements to integrate DER resources into the ISO's markets, consistent with existing state policy objectives. Her institutional knowledge of the ISO is of immense value to California as we advance our clean energy goals.

For the above reasons, the Council respectfully urges your support for Ms. Galiteva's re-confirmation to the California Independent System Operator (ISO) Board of Governors. Thank you for your time and consideration.

Sincerely,

Joseph Desmond
Executive Director
California Efficiency + Demand Management Council
